**Rent File and Other Clarifications**
by Manjusri Ishwara - Wednesday, 29 July 2026, 11:45 AM

The rent file is uploaded to the LMS under the assingment section. The rent file consists of purchase price of each property and the base rent which was missing in the original specification.

- I have included a purchase price for each proper and therefore all students are required to use the individual purchase prices of each property.
- Base price for each property group specified is **only to be used** for loan calculations.
- Both the purchase property price and the rent will be affected by the market and other conditions that occur in the board.

Other clarifaitions

- Income take base rate at the beinging of the game is **15% and market conditions will affect the rate** as well.
- Community development fund** will levy a tax on the player whom lands on the cell. The tax is **10% of the total assets of the player**. For the purpose of assets the current market rate of only the property(not buildings) is considered. **10% will also be affected by the market fluctuations.**

Assignment

 Submission 16-08-2026 @ 11.55PM

Opened: Tuesday, 21 July 2026, 12:00 AM
Due: Sunday, 16 August 2026, 11:55 PM

 **Assignment Brief** 2.0 MB PDF document

 **Rents** 739 bytes Comma-separated values

The property prices and rents can be directly read to the program using file reading. Individual property prices are included to make the scenario much realistic.

Topic 1 : Course Administration and Introduction
